

Vector Minimization Workshop

Adopting a proactive approach to minimizing vectors is cost effective and reduces the risk to public health

The Southern California Vector Control Environmental Taskforce is hosting a free technical workshop to address planning, design, and maintenance considerations related to the potential for vector production in a variety of land uses. Vectors (i.e., mosquitoes, rats, flies, ticks, and fleas) transmit diseases harmful to humans. Proper planning can largely avoid or eliminate vector problems and reduce liability. Vector minimization principles associated with structural stormwater BMPs, constructed wetlands, water management, and landscape design will be emphasized.

Workshop Presentations

Vector Control 101

Kelly Middleton, San Gabriel Valley MVCD

Stormwater BMPs with an Emphasis on Emerging LIDs

Marco Metzger, California Department of Public Health

Wetland/Riparian Site Design, Management, and Maintenance

Mark Daniel, Greater Los Angeles County VCD

Other Vectors and Nuisance Pests

Jim Green, Orange County VCD

Policy and Planning to Avoid Pests and Protect Public Health

Amber Semrow, Orange County VCD

Sacramento-Yolo MVCD Ecological Management Program

Marty Scholl, Sac-Yolo MVCD

Who Should Attend?

- Municipal/County Staff
- ◆ Planners
- ◆ Code Enforcement
- ◆ Public Works
- ◆ Maintenance and Operations
- Engineers
- NPDES Coordinators
- CEQA Consultants
- Developers
- Land Managers

Learn How to Reduce Mosquito Breeding and Vector Production Potential through:

- Planning Considerations
- Design Elements
- Maintenance Functions

Advantages Include:

- Increased Protection of Public Health and Safety
- Information Sharing and Reporting
- Cost Savings and Decreased Liability

**A Complimentary Lunch
Will Be Provided**

Tuesday, June 15, 2010 9:30am - 2:30pm

Greater Los Angeles County Vector Control District

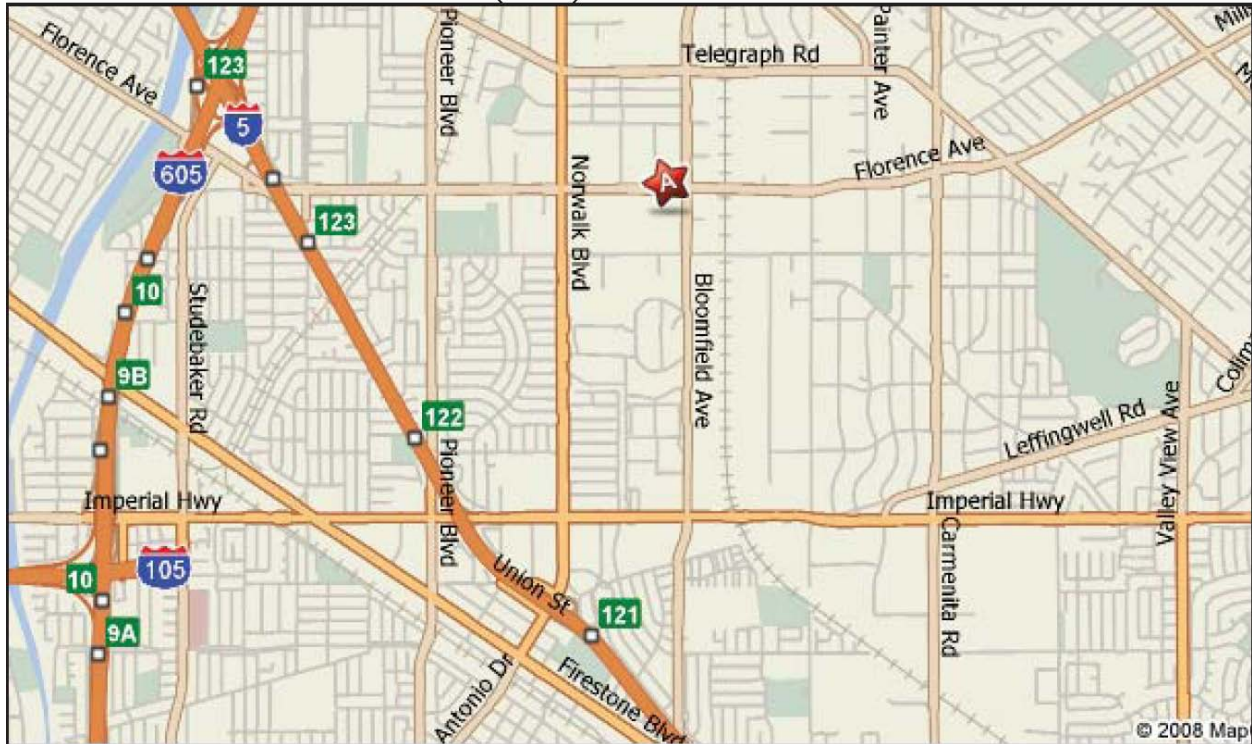

12545 Florence Ave. Santa Fe Springs, CA 90670

RSVP To asemrow@ocvcd.org or (714) 971-2421 (ext 140) by June 8

Space Is Limited!

Directions to Greater Los Angeles County Vector Control District 12545 Florence Ave, Santa Fe Springs 90670

(562) 944-9656

From the South: take 5 Fwy North, exit Carmenita, go North on Carmenita, turn left (West) on Florence, the District is on the NW corner of Florence & Bloomfield at 12545 Florence Ave.

From the North: Take 5 Fwy South, exit Florence Ave (pretend to be taking 605 South, off ramp is on the connector), turn left (East), turn left into District, just before Bloomfield. District is located at 12545 Florence Ave.
